CONFIGURATIONS

Once you have identified your space you can create your personalised showering solution; with our flexible modular glass panels, profiles and stabilising fixings the layout options are almost endless.

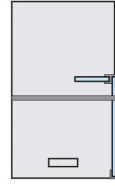

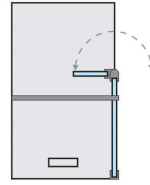

When choosing your configuration, we recommend you allow 500mm minimum entry space.

Deflectors

If you've decided to opt for a configuration with a deflector we have 2 options to choose from - 180° hinged or fixed. Each type requires different fittings, details of these are listed below.

We wouldn't recommend installing a deflector panel if you have chosen a glass to ceiling bracing bar.

180° Hinged Deflector Panel

Available in 300mm, our hinged panel rotates through 180° for easier access. The colour matching hinges and clear seal give you a walk in a seamless appearance.

- 1 x Glass Panel for Hinged Deflector
- 1 x Deflector Panel 180° Hinges (pair)

Fixed Deflector Panel

Available in 300mm or 400mm, for spaces where you prefer the panel not to move. The colour matching glass to glass brackets and clear seal give a luxury appearance.

- 1 x Glass Panel (up to 400mm max.)
- 1 x Glass to Glass Brackets (pair)
- 1 x Glass to Glass Seal

Additional Design Flexibility

The configurations shown are the most typical options; if you require something different please talk to your local bathroom specialist.
