At Bristan, we pride ourselves on our £16m stock holding at Tamworth HQ, supported by the excellent forecasting and work done by our Supply Chain team. We can manage the end-to-end supply chain, so customers don't have to, with a 99.5% stock availability. Offering a 250,000 ft<sup>2</sup> warehouse, we are able to maintain stock levels ensuring our products are accessible for our National and Regional Housebuilder partners, and together we will not let you down with our 95.5% Completed On Time, In Full (COTIF).

## Customer care

“We are only a phone call away providing expert advice on installation, maintenance checks and general troubleshooting. Should there be a more complex problem, we will arrange for one of our field service engineers to visit your site. We also have a dedicated Housebuilders Customer Services Team, who will respond within 48 hours on all email enquiries. All customer care enquires we receive from your customer we provide in a free monthly report.”

**Jade, Head of Customer Experience**

## Our in-house testing and accreditation

“At every stage of development, we ensure our products pass through UKAS 17025 accreditation within our in-house testing centre. Checking for any defects, weak spots or design flaws, and only when they have fully passed every test do we add them to our product portfolio. We ensure our products are fully compliant to UK Water Regulations, which guarantees your specifications fall in line with regulations and byelaws covering water supply and fitting.”

**Adrian, Technical Manager**

## A more sustainable approach

“We understand how crucial it is to meet Part G of the Building Regulations. So, we have ensured our ‘every drop counts’ approach to water efficiency is reflected in the number of products incorporating flow limiting features and our support for the European Water Label Scheme.

We also operate an ethical supply chain to limit consumption of non-renewable resources and reduce the environmental impact of our delivery vehicles. To further support our commitment to sustainability, we are also active members of the Supply Chain Sustainability School.”

**Chris, Product Director**

# Sustainability

Bristan Group strives to be an organisation that has a positive impact on our customers, our communities, and the environment.

Whilst we are proud of the actions we are taking, we acknowledge and are dedicated to do more. We are working with the Carbon Trust on their Route Net Zero Standard to reduce our carbon footprint year-on-year, looking at how we can better assist our team and local communities, and we are also regularly seeking consultation from industry experts on how to be a more sustainable organisation.

We are devoted to a programme of continuous improvement.

## Environmental

Our commitment in 2025 is to enhance sustainability throughout our operations and products, with a strong focus on improving energy efficiency in our building and advancing sustainable practices in our packaging.

# Energy Efficiency

As part of our commitment to improving sustainability, we have installed 1,666 solar panels, which are generating over 600kWh of electricity to support our everyday operation at our Tamworth Headquarters. This initiative will result in CO<sub>2</sub> savings of approximately 100,000kg per year, significantly reducing our carbon footprint.

## Sustainable Packaging

Starting in September 2024, we began to transition away from our current Jiffy and plastic envelopes to more sustainable options. We are working with our suppliers to introduce sustainably sourced packaging solutions and aim to reduce recycling content in our packaging by 30% before the end of 2025.

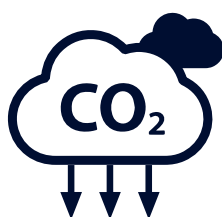

## Sustainable Partnerships

We are proud to be part of the Ecologi Scheme. In 2024, we have had 145 trees planted on our behalf.

## Environmental Product Declarations (EPDs)

We are actively working towards having EPD's for our products. These provide a comprehensive assessment of our products' environmental impact from cradle to grave.

## Route to Net Zero Standard

We have committed to achieving the Route to Net Zero Standard at the "Taking Action" tier. We have achieved a strong score of 27% against the carbon management requirements, reducing our Scope 1 & 2 emissions and business travel carbon footprint. We plan to continually further our progress going forward.

## Energy Consumption Reduction

We continue to make significant strides in reducing the energy we take from the grid, relying on power generated by the solar panels we had installed. In June 2024, we had reduced our consumption from the national grid by 74% with a cost saving of over £28K in that month alone.

## Warehouse Heating Upgrade

To support the reduction in Scope 1 emissions, we are upgrading our warehouse heating system by replacing the existing unit with two smaller, more efficient Powermatic® heaters that deliver the equivalent heat output. The new system is expected to achieve a reduction of approximately 130,000kWh annually.

# Waste Management & Recycling

We are proud to be a zero-to-landfill company. Our specialist waste management partner ensures that all general waste is mechanically sorted to extract recyclable materials, whilst any remaining residues are thermally recovered to produce heat and electric.

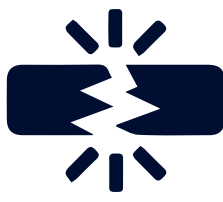

## Recycling

We produce around 89,000kg of waste every year which we re-purpose and reuse in the following ways:

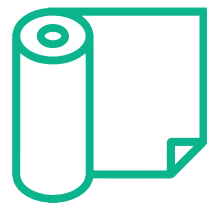

### Boxes used in our automated machines

are made of 100% recycled paper.

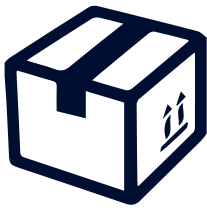

### All ceramic waste

is crushed and used as non-specification road-building material.

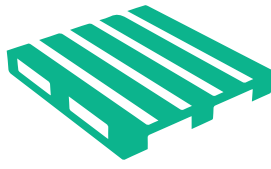

### Our bonding and stretch film

used to secure product onto pallets, has been replaced with 30% recycled material.

### All our transit packaging

is now made from recycled material.

### All broken pallets and wood waste

is used to make new pallets, shredded for the use in animal bedding or even converted to wood pellets for heating.

### All our redundant e-waste equipment

is securely recycled or refurbished for use in schools and other further education establishments.

# Water Efficiency

Reducing our water consumption remains a top priority and we have adopted water-saving initiatives within the business and into our product ranges.

## Water-Efficient Products

As the UK's leading provider of taps and showers, we are able to offer our customers a comprehensive range of energy and water-saving solutions, through:

### Pre-fitted flow limiters

Limits the flow to as little as 3.5 litres of water per minute, helping to reduce water consumption.

### Self-closing 'push button' taps

Designed to meet BREEAM standards and reduce water waste.

### Timed flow controls

Allows water to turn off after a certain amount of time to meet BS EN 816 standard.

### Infrared taps

Offers significant water saving by automatically turning off when not in use.

### Eco Start taps

Saves energy by having cold water as the default central start position of the tap handle.

### Water Recycling

Our in-house UKAS-accredited test lab recycles over 90% of the water used to carry out the endurance testing of our products.

# Water Saving

Installing water saving products not only helps the planet, it's good for homeowners too.

The average five-person household uses an estimated 493L of water a day\*. This equates to an annual water bill of £679 (for water and wastewater). With Bristan's water saving taps and showers, we can help to reduce these bills for homeowners. Our eco-friendly basin mixer taps feature built-in flow regulators to reduce the water flow to as little as 3.5 litres per minute, for greater water efficiency and smaller household bills.

## Flow Regulators and Aerators

Our flow regulators and aerators are easy to fit, and will help save money on water and heating year after year.

### Outlet Flow Regulators

Flow regulators can easily be retro fitted between a mixer body/shower valve **outlet** connection and the shower hose.

However, please note for **TMV2 approved products fitted on a combi boiler heating system**, it is recommended that flow regulators are fitted between the mixer body and **both shower valve inlet connections**.

This will ensure the valves performance is maintained, especially during the winter months, when the incoming water temperature is lower.

	ECO SPBAS 3.5	3.5 litres per minute (Spray Regulator)	Dark Blue**

\*Flow regulators which fit into tap tail \*\*Flow regulators which fit into tap spout

## Fitting a Flow Regulator to the tail of a tap

### Step One

The flow regulator will fit into the inlet of the tap

### Step Two

Carefully push the flow regulator into the inlet of the tap

### Step Three

Connect the pipework to the tap in the usual way

## Fitting an Aerator/Spray Regulator to a tap spout

### Step One

Carefully remove the existing flow straightener

### Step Two

Screw the new flow regulating aerator into place

### Step Three

Carefully tighten into the tap using a suitable spanner

# Customer First

From national names to niche market developers, we have worked with housebuilders of every kind. We understand your needs to deliver stylish new homes for your customers and meet the deadlines that drive your business, along with providing the high levels of customer aftercare you expect.

Working as a true specification partner with all of the National Housebuilders - our values, ethics and goals are always aligned, supporting with new initiatives, sustainability, reducing waste and carbon footprint.

Whether it's for a starter home, luxury five bedroom or a chic city build to rent apartment, we have the expertise and product selection to create that elusive 'wow factor' for the kitchen and bathroom.

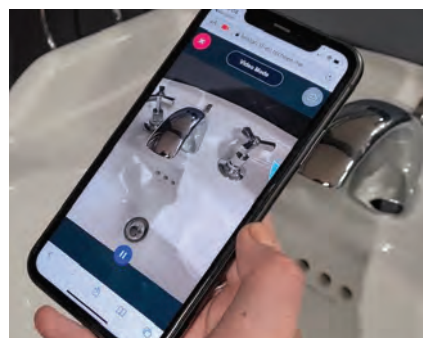

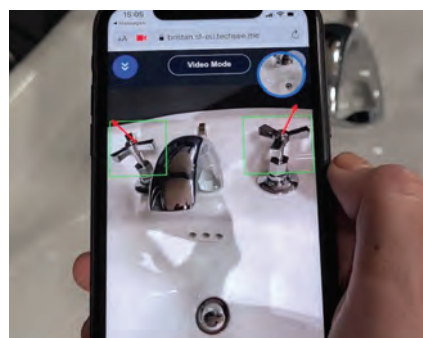

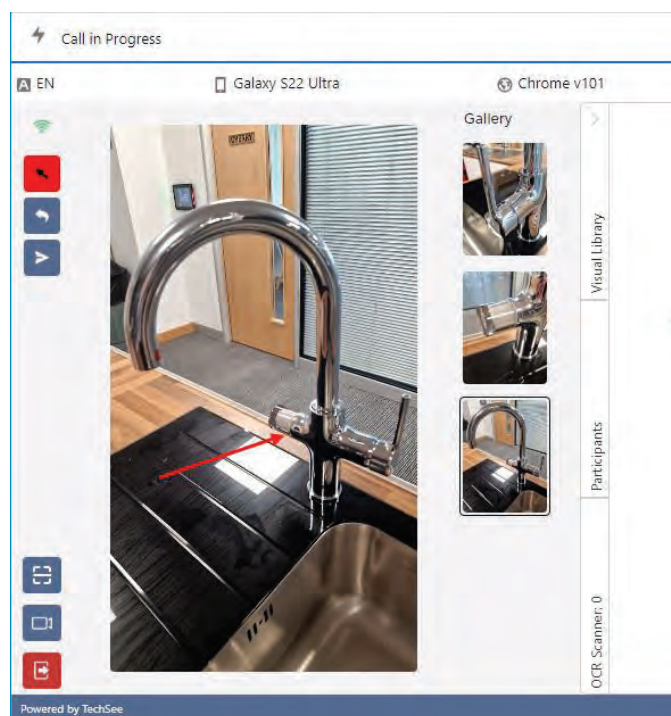

# The Bristan Difference

Looking after our customers with an award-winning customer care team and industry leading technology.

- Exceptional, award-winning customer service team based in our UK headquarters, providing technical help and support when you need it
- 99% of enquiries handled 'right first time'
- Reliable guarantees across all of our products
- Rated Excellent on Trustpilot
- A team of mobile service engineers offering on-site labour support for products within warranty
- Spares available for several years after a product line is discontinued

## Visual Remote Assistant (VRA)

Technology that enables our customer service team to identify and solve customer enquiries remotely using video calling and in-call link sharing.

# The Easy Choice for Family Bathrooms

## Part G Compliant Hot Water Safety

A crucial part of being Part G compliant is ensuring that baths in new homes and rental properties have thermostatic control of water temperatures. To guard against scalding, especially in properties that may be home to vulnerable groups such as young children and the elderly, all baths are required to fit a device that limits the hot water to a maximum of 48°C.

Our range of market leading thermostatic mixing valves offer full compliance and peace of mind to the housebuilder, housing provider and homeowner.

Rigorously tested products, along with reliable guarantees and award-winning after care, makes choosing Bristan the easiest decision you will make.

For the full Part G document,  
visit [www.planningportal.gov.uk](http://www.planningportal.gov.uk)

## Eco Start. Taps that start cold to take the heat out of your energy bills.

Eco Start saves energy by having cold water as the default central start position of the tap handle. Hot water is only activated when the tap lever is moved from the central position, so your boiler is not unnecessarily fired up. Cutting emissions and saving you money.

## Guaranteed for 10 years

Our taps are built around cartridges tested to 500,000 cycles with improved flow rates and smoother operation.\* You really can count on Bristan taps.

\*Exclusions, terms and conditions apply. For more information, visit [bristan.com/service-centre/guarantees](https://bristan.com/service-centre/guarantees)

**Hourglass**  
Bath Filler

# Bathroom Taps

Taps are more than just extras, they are the perfect finishing touch. With our range of contemporary design options that help you create bathrooms that are distinctive, on-trend and effortlessly stylish.

## Ranges:

Gold	Silver	Bronze
Appeal Hourglass Moida Saffron	Elevar Liso Napoli Qubo	Mios Opus Polo

## Product Benefits:

Features ceramic cartridges for long life durability and more precise control.

Comes with metal fixings to secure your tap in place, so it won't move or rotate during use.

A hard-wearing, flawless finish that lasts for years. It's also scratch resistant and salt spray tested to ensure added durability.

Matching taps and showers are available.

The water starts cold, so you won't activate the boiler unless you move the lever from the central position, saving energy.

## Appeal

Our Appeal range features a gently curving spout, stylish lever handle and thickset body, mixing elegance and practicality. This versatile shape will suit any bathroom environment.

Available in three distinct finishes.

Appeal basin mixers use Eco Start technology.

Thermostatic Bar Shower

# Showers

A shower that looks purposeful and powerful, not to mention stylish, is a big plus point for potential homebuyers looking for practicality during a working week and that little extra luxury at the weekend.

## Ranges:

Gold	Silver	Bronze
Hourglass Molida Prism Saffron	Carre Qubo	Buzz Craze Frenzy Napoli Zing2

## Product Benefits:

Designed to keep the exterior cool to the touch, ensuring you're never at risk of scalding.

Thermostatic temperature control and automatic stops prevent surges of hot or cold water.

A hard-wearing, flawless finish that lasts for years. It's also scratch resistant and salt spray tested to ensure added durability.

Matching taps and showers are available.

This shower saves as much water as possible (but it doesn't feel like it).

One shower outlet.

Two shower outlets, which only run separately.

Designed to make installation quicker and easier.

Will use existing holes and fixings to fit in the same spot as your previous shower.

This shower fully soaks you with water for the most indulgent showering experience.

There's no need to scrub. Limescale build-up can be easily wiped off the nozzles of this shower product.

# EASYFIT

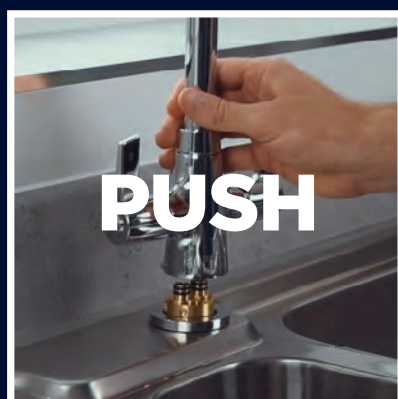

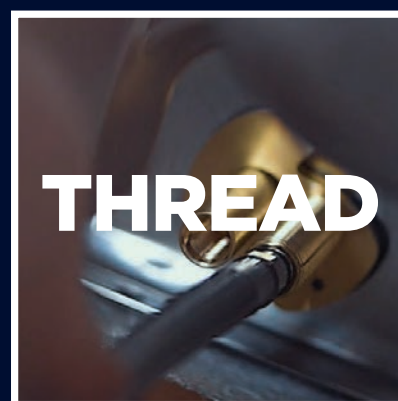

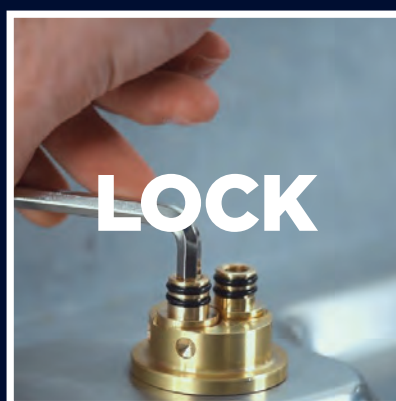

Bristan's well-established Easyfit range has been developed to make kitchen tap installations even easier. Featuring innovative Top Fix technology, our range of kitchen taps can be easily installed in a matter of minutes.

All Easyfit products are supplied with everything you need in the box, including:

- An Allen key
- Isolation valves
- Easyfit base
- Easyfit tool
- Flexi tails

They also feature ceramic cartridges for added durability and smooth operation, and metal fixings for longevity.

Easyfit kitchen taps have been rigorously tested and come with the backing of Bristan's 10-year parts guarantee\*, and exceptional after-sales support.
