

Bathing

At QX, we believe great bathroom design begins with choice, quality, and attention to detail. Working closely with our designers and manufacturing partners, we have developed a comprehensive bath collection to suit every style and requirement. From sleek contemporary inset baths to elegant freestanding designs that create a stunning focal point, our range offers the perfect solution for any bathroom.

For more compact spaces, we offer a selection of smaller bath sizes, practical corner baths, and dedicated shower baths that combine bathing and showering in one versatile solution. Many models are available in both Standard and Ascent Superspec finishes, with the Superspec specification providing enhanced rigidity and durability for added peace of mind.

Nothing brings a sense of luxury to a bathroom quite like a freestanding bath. Our Tima freestanding bath takes this a step further, featuring an integrated tap and soap ledge for a beautifully refined and practical bathing experience.

For those seeking additional comfort and indulgence, six whirlpool systems are available and can be custom fitted to the majority of our bath range, transforming everyday bathing into a truly relaxing experience.

The Alpha range delivers excellent quality at outstanding value for money and is available in the most popular bath sizes, making it an ideal choice for a wide variety of projects and budgets.

Please note: All Genesis and Ascent Baths come with adjustable bath leg sets that range from 86mm to 180mm.

All Baths marked with the following logo can be fitted with your choice of Whirlpool System, detailed on p136-138

ASCENT SUPERSPEC

Acrylic baths offer a range of benefits that make them a popular choice among homeowners. First and foremost, acrylic is a lightweight and durable material, making it easy to handle during installation and resistant to cracks or chips over time. Additionally, acrylic is a non-porous material, which means it is highly resistant to stains and easy to clean, requiring only mild soap and water for regular maintenance. Furthermore, acrylic baths have excellent heat retention properties, allowing the water to stay warm for longer periods, creating a luxurious and relaxing bathing experience.

Our Ascent Superspec baths have an additional layer applied to the outer surface of the standard bath. This process not only increases the overall thickness it further improves the heat retention properties synonymous with acrylic baths.

ACRYLIC

Acrylic is lightweight, durable, non-porous and versatile. This makes for a perfect material for the inner surface of a bath tub, that remains warmer for longer and offers a soft feel to the touch.

BASE BOARD

All our baths come with a fully encapsulated base board. Made from moisture resistant chipboard the baseboard stiffens the bottom of the bath, offers greater insulation and provides a strong core on which to mount the bath onto the legs.

POLYESTER-GLASS COMPOSITE

Our Polyester-glass composite is sprayed onto the back side of the acrylic and encapsulates the base board on all of our baths. This gives the bath exceptional strength whilst maintaining a low weight profile.

ASCENT SUPERSPEC

Offering increased structural durability and significantly improved insulation properties through an additional composite polyester glass layer.
