

Bathing

At QX, our philosophy centres around strong design, exceptional quality, and a focus on choice. Through partnerships with our designers and manufacturers, we have created a range of baths that caters to all preferences and requirements, whether it's a contemporary inset or a classic freestanding bath that serves as the centrepiece of your bathroom.

If space is at a premium we have a number of smaller sizes, along with corner bath options and dedicated shower baths for dual purpose. In many options we offer both Standard and Ascent Superspec finish, with the Ascent offering giving an added rigidity to the bath.

A freestanding bath brings an element of luxury to the bathroom, and the Tima freestanding bath, with built in tap and soap ledge, offers that and more in abundance.

An alternative option to add some luxury is one of our 6 whirlpool systems. These systems can be custom fitted to the majority of our bathing range.

The Alpha range of baths offers excellent quality at outstanding value for money, and has availability in the most popular sizes.

Please note: All Genesis and Ascent Baths come with adjustable bath leg sets that range from 86mm to 180mm.

All Baths marked with the following logo can be fitted with your choice of Whirlpool System, detailed on p136-138

ASCENT SUPERSPEC

Acrylic baths offer a range of benefits that make them a popular choice among homeowners. First and foremost, acrylic is a lightweight and durable material, making it easy to handle during installation and resistant to cracks or chips over time. Additionally, acrylic is a non-porous material, which means it is highly resistant to stains and easy to clean, requiring only mild soap and water for regular maintenance. Furthermore, acrylic baths have excellent heat retention properties, allowing the water to stay warm for longer periods, creating a luxurious and relaxing bathing experience.

Our Ascent Superspec baths have an additional layer applied to the outer surface of the standard bath. This process not only increases the overall thickness it further improves the heat retention properties, synonymous with acrylic baths.

ACRYLIC

Acrylic is lightweight, durable, non-porous and versatile. This makes for a perfect material for the inner surface of a bath tub, that remains warmer for longer and offers a soft feel to the touch.

BASE BOARD

All our baths come with a fully encapsulated base board. Made from moisture resistant chipboard the baseboard stiffens the bottom of the bath, offers greater insulation and provides a strong core on which to mount the bath onto the legs.

POLYESTER-GLASS COMPOSITE

Our Polyester-glass composite is sprayed onto the back side of the acrylic and encapsulates the base board on all of our baths. This gives the bath exceptional strength whilst maintaining a low weight profile.

ASCENT SUPERSPEC

Offering increased structural durability and significantly improved insulation properties through an additional composite polyester glass layer.
